Acrylic UNO Base

SKU:DWG0003

INTRODUCTION

Arduino UNO is a very popular product, many makers to use it to build their own project.

Last week, our beautiful girl engineer suddenly blurting: "If it has a nice base and this stick ah!", Let's make it! "

We compared a variety of different colors and materials, after repeated screening, and ultimately to select it: 68% transmittance, milky white, double-sided frosted acrylic panels, Made in Germany！ High precision laser cutting and high-quality raw materials to produce this beautiful base.

It can be installed under your arduino UNO. It will protect the board and make it more Eye-catching! Just for the nice looking worth to your arduino UNO with a arduino UNO Base.
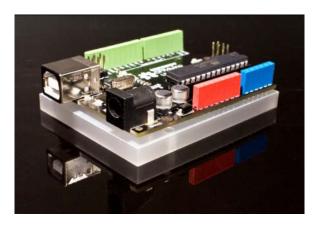

You do not come to a do!

It is also compatible with Arduino Leonardo.

SPECIFICATION

- Thickness：6±0.5mm (0.24±0.02")
