Fixing Elements for Tubes and Harnesses, for Edges

EdgeClip-Family

Edge Clips are used in the automotive and electrical industries for applications where it is impossible to drill holes or no other fixing points are available.

Features and Benefits

- Releasable fixing elements with EdgeClip
- Low-vibration routing of larger bundle diameters
- Can be easily pushed onto an edge by hand
- Can also be snapped together with one hand
- Bundles can be released at any time
- EC27: fixing element enables use of smaller bundle diameters
- EC41: for parallel guidance of two bundles

EdgeClip cable and tube clips are suitable for the low-vibration routing of cables and tubes with larger bundle diameters.
