

GaN Performance at MOSFET Prices

New family of eGaN® FETs offer:

- Superior performance*
- Smaller size*
- High reliability*
- Low price point*

A World Beyond Silicon...

GaN today is facing a period of extremely rapid growth because semiconductors using this material give companies a major performance and cost advantage.

GaN's growth is coming from both the replacement of existing silicon devices, as well as from entirely new applications that are enabled by its superior performance.

The end of the road for silicon...

**EPC2035/2036
60 V/100 V**

GaN Performance at MOSFET Prices

Digi-Key P/N	Manufacturer P/N	Description
917-1099-2-ND	EPC2035	60 V eGaN® FET
917-1102-ND	EPC9049	Development board featuring EPC2035
917-1100-2-ND	EPC2036	100 V eGaN® FET
917-1103-ND	EPC9050	Development board featuring EPC2036
