Hot Air Barrel Tools:
Ideal for roofers and floor layers.

Welding, heat-shrinking, shaping, removing – hot air makes all sorts of jobs
incredibly easy. Jobs that demand precision, high performance and reliability.

Professional Floor Layer
"The STEINEL HG 2620 E is
the best tool for floor laying."

The art of understanding heat.

Precision and control on hot air tools is imperative for a wide range of technical applications. STEINEL only uses top quality, long-lasting components that come from our development history. This is where our customers benefit from over 30 years of experience in developing and manufacturing hot air tools to give them a product that has been cleverly engineered in every last detail, only delivering heat where it is needed.

Ideal for the trades and industry. Our flagship.
Hot air tool **HG 2620 E**

If you want the best when it comes to performance and precision: Delivering 1750W of power, the HG 2620 E hot air tool is controlled by a toggle in 10°F steps between 120- 1300°F while letting you set four individually tailored programs. The temperature is indicated on the LCD information display where it is easy to read at any time. The airflow rate is continuously variable between 2-13 cfm and is easy to adjust. Full air-pressure power is 3,000 Pa. The powerful brushless motor gives our flagship tool a working life of over 10,000 hours. Thanks to its robust design as well as the specially protected electronics with fine dust filter, four individually selectable programs and the heavy-duty H07 power cord, it is the safest, most dependable heat tool on any construction site.

Also available in a convenient carrying case.

Welding linoleum floors.

LCD display always in view	Single-hand operation by toggle	Magnesium guard sleeve, plug-in heating element	Residual heat indicator
Restart protection	Includes fine dust filter	Replaceable power cord	Ergonomic soft grip handle

Technical specifications

Power: 1750W
Amps: 14.8A
Temperature: 120- 1300°F (50-700 °C)
Airflow rate: 2- 13 cfm (+/- 0.5 cfm)
Air pressure: 3,000Pa
Motor: brushless
Motor life: 10,000 hours
Temperature setting: on display, in 10 °F steps by toggle
Heating element: ceramic heating element
Lockable Override Control (LOC): yes
Create Preset Customizable Programs: yes
Thermal cutout: yes
Double Insulated: yes
Power Cord: Industrial grade rubber
Nozzle Diameter: 1.26" (32.00mm)
Dimensions (l x w x h): 14.10" x 3.60" x 3.70"
Voltage: 120VAC, 50/60Hz
Weight: 1.85lbs (29.63oz)
Warranty: One year limited

For safety and precision.
Temperature scanner **HG Scan PRO** for HG 2620 E

With the HG Scan PRO, you can be sure of the exact temperature at the work piece. It works in a range of 30 - 570 °F (0 - 300 °C) with absolute precision – and informs you visually as well as audibly if the temperature exceeds or falls below the level you have set. The integrated laser technology ensures the ideal distance from the work piece. And being perfectly compatible with our top HG 2620 E and HG 2520 E tools, all relevant data are intelligently communicated between scanner and hot air tool. The particularly clever way to complement your set of tools.

Hot air and temperature measurement with one hand.

Ideal for all heat-sensitive materials

Slim. Lightweight. Ergonomic.
Hot air tool **HG 2220 E**

The HG2220 E weighs only 1.34 pounds (610g) and has a powerful 1500W motor that heats the flow of air across a continuously variable temperature range of 167 - 1166 °F (80 - 630 °C) via an easily adjustable thumbwheel. Nozzles are push-on and simple to attach. A perfect tool for all professionals with a preference for practical things – and, thanks to fine dust filter and long-life brush motor, who also want it to give them lasting service.

Professional edgebanding.

Two-stage airflow

Continuously variable temperature setting

Fine dust filter included

Ergonomic soft grip handle

Replaceable power cord

Fits all 1.34" diameter Industry Standard Nozzles

Technical specifications

Power: 1500 W
Amps: 12.5 A
Temperature: 120 - 1100 °F (50-600 °C)
Airflow rate: 4-7/6-12 cfm (+/- 0.5 cfm)
Temperature setting: thumbwheel
Heating element: ceramic heating element
Thermal cutout: yes
Double Insulated: yes
Power Cord: Industrial grade rubber, length: 6ft
Nozzle Diameter: 1.34" (34.00 mm)

Our most powerful tool. 3400W, 28cfm.
Hot air tool **HG 5000 E**

Bursting with strength and staying power: with its powerful 3400W brushless motor rated for 20,000 hours of service, the HG 5000 E delivers up to 800 litres of air a minute over an infinitely variable temperature range of 80-1100°F (20-600°C). Its generously sized outlet nozzle reaches a pressure of 3,000 Pa. Making it the ideal tool for working on large surfaces. From fully electronic temperature and airflow adjustment to intelligent motor and temperature control and clearly structured LED segment display, it comes with everything that professionals need for working with hot air in industry. The mains power cord and heater are particularly easy to change. Changing the screw-on nozzle attachment is just as simple.

Also available in a convenient carrying case.

Pistol Grip Hot Air Tool: Pulling out all the stops at work.

Absolute precision is essential when working with a heat tool. It should fit perfectly in your hand and let you work without tiring. This is why we have focused on ergonomics when developing our pistol-type hot air tools. Long life, exact temperature settings, and ease of operation with just one hand are part of the standard repertoire at STEINEL.

Professional Electrician
"Precision is important in my line of work, so I need a heat gun that provides control and accuracy, so I chose STEINEL."

More power. More heat. More life time with brushless motor
Hot air tool **HG 2520 E**

STEINEL's strongest pistol grip hot air tool is equipped with a powerful and extremely durable brushless motor that produces hot air up to 3,000 Pa with absolute precision. The temperature can be varied by toggle with one hand in 10°F steps and read from the clear LCD information display at any time. It's just as easy to adjust the airflow rate between 2-13 cfm and select any of the four individually tailored programs. Weight in at a mere 1.85lbs, this professional hot air tool is perfect for construction site use and uses professional standard nozzles.

Also available in a convenient carrying case.

Absolute precision. From the word go.
 Temperature scanner **HG Scan PRO** for HG 2520 E

Precise, reliable, intelligent: the HG Scan PRO is the ideal addition to the HG 2520 E hot air tool. Once fitted on the housing you will have complete control of current temperature and distance from the work surface. Interactive data communication between tool and scanner as well as audio and visual signals let you keep everything in the optimum range. To make your work even easier.

Digital precision. Heat gun **HG 2320 E**

Cutting-edge technology for perfect results: The HG 2320 E generates an impressive 1,600 watts of power and delivers hot air between 120 and 1,200 °F. Temperature is very easy to control via toggle, giving you absolute precision. Together with the residual heat indicator, the LCD information display ensures additional certainty while the four individually selectable and customizable programs provide maximum flexibility. At the same time, all tool settings can be locked using the LOC function to rule out any accidental changes. In conjunction with the various push-on nozzles from the range of accessories, the HG 2320 E is an excellent choice for working on heat-sensitive objects. The heat gun is also available in an ESD version for use in electrostatically sensitive areas.

Conquers any challenge. Heat gun HL 2020 E

Experts prefer the sturdy HL 2020 E heat gun. The electronically controlled heat tool delivering 1,600 watts of power is easily operated via toggle, regulates temperature between 120 to 1,150 °F and provides convenient handling with its LCD display. The residual heat indicator warns the user that the outlet nozzle is still hot. The precision adjustable heat and powerful blower make the HL 2020 E the ideal choice for virtually any application – heat shrinking tubes and sleeves onto cables, welding and many other challenging jobs.

Desoldering components from circuit boards with pinpoint accuracy.

For challenging jobs.
Heat gun **HL 1920 E**

Finished to a high level of quality with optimum weight balance and long life, the HL 1920 E heat gun is an absolute "must" for anyone attaching importance to quality. The multi-talented tool impresses with 1,500 watts of power, infinitely variable temperature adjustment from 120 to 1,150°F and airflow control in three stages. And if it ever gets too hot when welding plastic or stripping paint, the automatic cut-out protects the tool from overheating.

Using heat for getting plastic into exactly the right shape.

Hot. But never too hot.
 Temperature scanner **HL Scan**
 for HG 2320 E – HL 1820 S

The right solution for every need. And for every tool. To ensure the right working temperature on heat-sensitive work pieces at all times, this is why we offer a solution for our pistol grip hot air tools that is no less intelligent. For practical single-handed operation: simply fitted to the housing of an HG 2320 E/ESD or HL 2020 E/1920 E/1820 S the HL Scan provides the user with all relevant information: the precision digital display and audio signals reliably show whether the temperature is too hot, ideal or too cold.

Multi-purpose heat gun. Heat gun **HL 1820 S**

On the HL 1820 S, the temperature not only adjusts from 120 to 750 to 1,100 °F in three stages – the airflow does too (4, 7 and 13 cfm). The optimized weight balance virtually rules out fatigue while working. The ergonomically shaped handle with soft inlay ensures optimum handling and the integrated thermal cut-out prevents over heating. The tool can be used with all industry standard nozzles, making all sorts of different applications even easier – for example, de-icing, drying, shaping, heat shrinking and much more.

Making easy work of soldering, de-soldering,
heat-shrinking.
Heat gun **HG 350 ESD**

The high-tech HG 350 ESD heat gun impresses with maximum precision and optimized ergonomics. The temperature can reach 750 °F as well as 930 °F when using a reduction nozzle. A temperature indicator shows whether the outlet tube is too hot to touch, this tool also comes with an integrated LED light that always provides optimum illumination and perfect visibility. The tool is also ESD-safe, also making it suitable for use in electrostatically sensitive areas. This tool is compact and includes a lightweight design.

Also available in a convenient carrying case.

Ideal for desoldering

Integrated LED work light

Optimised weight balance

Ergonomically shaped soft-grip handle

Off/cold/hot

Built in hanger

Technical specifications

Power: 300 W
Amps: 2.5 A
Temperature: 750 - 930 °F (400-500 °C)
Airflow rate: 3.5 cfm
Power Cord: Industrial grade rubber, length: 6ft
Nozzle Diameter: 0.75" (19 mm)
Dimensions (l x w x h): 9.00" x 11.50" x 3.00"
Voltage: 120 VAC, 50/60 HZ
Weight: 1.50 lbs (24.00 oz)
Warranty: One year limited

Ordering details

109964900 (folding box), 2.05 lbs (32.80 oz)

More is better.
Heat blower **HB 1750**

Maximum power for perfect results: The HB 1750 delivers almost 30 percent more air than conventional heat blowers. This makes particularly fast and efficient work of any job – whether drying paint, shaping plastic, heating shrink film or heat shrinking tubes and sleeves onto cables. Five interchangeable color coded keys can be used for selecting the perfect temperature for any job from 100 to 1,200°F. Comes complete with an adjustable support stand, this extremely quiet tool is suitable for stationary use. The support stand also provides a practical place to keep the color coded keys that are not being used. The soft grip handle guarantees maximum comfort even after long periods of use.

Also available in a convenient carrying case.

Drying plasterwork faster with hot air.

Adjustable Stand

Baffle Adjusts Air and Temperature within Range

Cool Air Stage

Quick and easy field changeable element

Simple change of temperature keys

Technical specifications

Power: 1750 W
Amps: 14.6 A
Temperature: 200° - 1200 °F (95° - 650 °C) all 5 keys
Airflow rate: up to 23 cfm, adjustable with baffle
Power Cord: Industrial grade rubber, length: 6ft
Nozzle Diameter: 1.70" (43.50 mm)
Dimensions (l x w x h): 10.80" x 5.80" x 9.50"
Voltage: 120VAC, 50/60 HZ
Weight: 2.90lbs (46.40 oz)
Warranty: One year limited

Gas Torches: Red-hot perfection.

Professionals know how important the right tool is. But we don't just want to offer you a tool for the job you are doing – we want to offer you the best one. This is why we are working on making our gas torches even more powerful, efficient and convenient to use. The consistent use of innovative technologies and high-quality materials lets us make sure that you can rely on the portable torches from STEINEL in any situation. Whether for the odd minor repair or for everyday use in industry

Ready for anything.
Ultimate Butane Kit.

The ultimate solution for any conceivable challenge: The kit includes no fewer than three professional tools as well as a wide range of accessories. The cordless TT 175, TT 30 and TS 550 gas torches reach their respective operating temperatures within a maximum of just 20 seconds and are suitable for virtually any application – from soldering or de-soldering to working on foam and heating heat-shrinkable tubing. Providing maximum flexibility, the kit contains a wide selection of attachments that can be changed quickly and easily. Also included in the Ultimate Butane Kit are two gas bottles, cleaning tools and a selection of heat-shrinkable tubes – all perfectly packed in a high-quality tool case.

Available in a convenient carrying case.

Heat Chemicals with the ThermoTorch™ 270

Technical specifications

Top model for the most exacting of demands.
Gas torch **TT 270**

The ThermaTorch™ 270 keeps even the most extreme of temperatures perfectly under control: It produces a 2,500 °F flame that burns steadily and evenly all the time. The flame intensity can be infinitely varied. Featuring a refillable tank holding 60 milliliters of butane gas, the TT 270 can be operated continuously for up to 120 minutes. This makes it the ideal tool for challenging jobs whenever maximum performance is required.

Preferred choice for hundreds of applications.
Gas torch **TT 175**

From automotive repairs and plumbing jobs to industrial use, the ThermaTorch™ 175 makes very easy work of heating, soldering and de-soldering. The steady flame reaches a temperature of 2,400 °F and, like the airflow rate, can be adjusted to suit any application. In addition to its exceptional quality finish, the tool also leaves no margin of doubt with its 60-milliliter tank that enables over 120 minutes of uninterrupted use.

Solder joints on copper piping

Technical specifications

Temperature: 2500 °F (1300 °C)
Operation Time: Up to 120 min (90 min at mid setting)
Fuel Capacity: 60 ml refillable fuel tank
Fuel Type: Standard butane fuel
Ignition: Water proof piezo electronic system
Dimensions (l x w x h): 6.25" x 4.70" x 2.50"
Weight: 0.64 lb (10.24 oz)
Warranty: One year limited

More ergonomics, less weight.
Gas torch **TT 151**

The ThermaTorch™ 151 weighs in at a mere 0.3 pounds but is still packed with powerful advantages: The temperature of the butane flame reaches 2,400 °F and can be adjusted in any way to suit the job in hand. In addition its compact size, the multi-purpose tool impresses with its ergonomically designed grip handle and stable standing surface. The refillable butane gas tank holds 20 milliliters and produces approximately 60 minutes of work with a medium flame.

Mini-tool providing maximum performance.
Gas torch **TT 30**

Small, practical, reliable – the ThermaTorch™ 30 not only fits into any pocket, it also does a great job even under difficult conditions. The flame even burns in strong winds at an adjustable temperature of up to 2,400 °F. The ignition system is watertight. And the self-closing cap protects the tool from soiling. This makes the TT 30 a great helper in the field – whether for professional or personal use.

Caramelize Crème Brûlée easily

The authority in its field.
Gas soldering iron
TS 600 / TS 600 K

The ThermaSolder™ 600 lets you get more done. Its tank has a capacity of 38 milliliters, providing an amazing 200 minutes of use. But these are not the only top specifications the gas soldering iron can offer. It also produces a powerful output of 30 to 125 watts as well as temperatures of up to 2,400°F. The wide range of accessories makes it ideal for countless applications. The TS 600 K kit contains a heat blower tip that generates flameless heat of 1,400°F, a soldering tip that can be heated to 1,000°F and many other attachments for getting virtually any job done professionally and quickly.

One tool – countless options.
Gas soldering iron
TS 550 / TS 550 K

Prepared for anything: The powerful and quality-crafted ThermaSolder™ 550 gas soldering iron delivers a temperature of 2,400°F – and top results in numerous applications. The TS 550 Kit features accessories that are ideal for soldering at up to 1,000°F, cutting foam, repairing jewelry and working on many other materials with ease. The gas soldering iron can be used continuously for approximately 160 minutes on a single butane gas filling of 25 milliliters. It generates an output of 30 to 125 watts – without any power cords to get in the way. As with the TS 600, it features a reliable piezo igniter and reaches its optimum operating temperature in a mere 15 seconds.

Create an even seal on solder sleeves

Technical specifications

Soldering Iron Tip: 480 - 1000°F (250 - 550°C)
Torch: 2400°F (1316°C)

A whole raft of benefits.
Gas soldering iron
TS 500 and TS 500 K

Heat up for 20 seconds – work for 120 minutes: The cordless ThermaSolder™ 500 has a 20-milliliter butane tank that enables uninterrupted use of the gas soldering iron even over prolonged periods. The gas soldering iron flame reaches a temperature of 2,400 °F while producing an output of 25 to 80 watts. The medium-sized TS 500 K contains the most important extras for professional soldering or de-soldering, for modeling plastics, cutting foam, fitting plug connectors and more. As with the TS 600 K and TS 550 K, all parts come in a practical case that ensures space-saving and safe storage.

STEINEL quality to take with you.
Gas torch **TH 310**

Whether in the workshop or in the field, the portable high-performance ThermaHeat™ 310 gas torch is always handy and reaches an operating temperature of 1,400 °F in just 15 seconds. It generates flameless heat that can be used for all manner of applications. The TH 310 comes with a convenient piezo igniter and a butane gas tank with a capacity of 38 milliliters, and can be operated for a full 120 minutes on a single tank. It also comes with an attachable deflector for working with heat-shrinkable tubing.

The declaration of independence for professionals. Hot-melt glue applicator TM 6000

Full freedom of movement rather than an annoying cable: Operating on butane gas, the TM 6000 requires no electrical power source which means it can be used virtually anywhere. The extremely sturdy hot-melt glue applicator reaches its operating temperature in just 3 minutes. Its fuel cells are based on innovative LEC™ technology. The cells can be quickly changed in just a few seconds and enable continuous use for up to 100 minutes. At the same time, the TM 6000 impresses with a fast, even flow of glue during use – and stops the glue from flowing immediately afterwards. This reduces dripping to a minimum. The professional tool is suitable for glue cartridges with a diameter of 1/2 inch and a melting temperature of 320 to 464 °F.

Glue packaging with ease and efficiency.

Combines simplicity and high-tech.
Hot-melt glue applicator GF 3002

Designed for making gluing work even easier: The GlueFix™ 3002 weighs just 0.7 pounds, impresses with intuitive operation and enables fatigue-free working over long periods. It produces a constant, precision flow of glue which is instantly interrupted by the anti-drip nozzle after use. Made of die-cast aluminum, the heating chamber stores heat to optimize throughput. At the same time, the unique PTC (positive temperature control) electronic heating system constantly ensures the ideal gluing temperature – throughout the entire period of use. Given its exceptional level of performance, the GF 3002 is appreciated both in industry as well as in the trades where it is used for bonding all kinds of materials.

PVC Plastic Welding Rods 16 pcs	110048754	50
Flat Angled Nozzle 20x2 mm.....	110049713	51
Flat Angled Nozzle 20x2 mm, straight	110037580	51
Flat Angled Nozzle 20x2 mm, 100°	106934900	51
Flat Angled Nozzle 30x2 mm, 60°	110039176	51
Flat Angled Nozzle 40x2 mm	110049712	51
Flat Nozzle 40x2 mm perforated	110038670	51
Flat Nozzle 60x2 mm for bitumen.....	110038674	51
Tarpaulin Scissors	110038728	51
Fillet Weld Feeder	110039165	51

Pressure Roller Ø 45 mm	110049584	51
Pressure Roller Ø 35 mm	110031646	51
Pressure Roller Ø 50 mm	110038455	51
Pressure Roller Ø 33 mm	110048203.....	51
Soldering Reflector Nozzle	110039169.....	51
Reflector Nozzle 20mm	110039167	51
Reflector Nozzle 35mm	110039168.....	51
Sieve Reflector Nozzle 35x20mm.....	110038726.....	51
Sieve Reflector Nozzle 50x35mm.....	110038725.....	51
Shell Reflector Nozzle 150x25mm.....	110039170	51

Accessories for HG 2620 E, HG 2520 E

Temperature Scanner HG Scan PRO for HG 2520 E.....	110033594.....	52
Temperature Scanner HG Scan PRO for HG 2620 E.....	110033508	52

Accessories for HG 5000 E

Flat Nozzle 70x10mm	110049715	52
Flat Angled Nozzle 74x3mm	110049716	52
Sieve Reflector Nozzle 85x85mm.....	110039174	52
Hinged Reflector Nozzle 72x70mm	110039171	52
Shell Reflector Nozzle 250x45mm.....	110039175	52
Heavy Duty Metal Case.....	103944400	52
Metal Heat Gun Stand	110049032	52

Accessories for HG 350 ESD

Reducer with Guard 5mm	110048651	52
Reflector Nozzle 40mm	110049699	52
Reflector Nozzle 10mm	110049698	52
Precision Reflector Nozzle.....	110049697	52
Reduction Nozzle 7mm	110050181	52

Accessories for HB 1750

Reducer 7mm	110049693	53
Spreader 200mm	110049696	53
Large Reflector 50mm.....	110049694	53
Small Reflector 20mm	110049695	53
Key Set (5 pcs)	110050796.....	53
Blue Key 200 - 300°F (95 - 150 °C).....	110050525.....	53
Gray Key 300 - 500°F (150 - 260 °C).....	110050526.....	53
Yellow Key 500 - 750°F (260 - 400 °C).....	110050527.....	53
Orange Key 750 - 1000°F (400 - 540 °C)	110050528.....	53
Red Key 1000 - 1200°F (540 - 650 °C).....	110050529.....	53

Accessories for HG 2220 E, HG 2320 E/ESD, HL 2020 E, HL 1920 E, HL 1820 S, HL 1620 S

Spreader Nozzle 50mm	110048643	53
Spreader Nozzle 75mm.....	110048644	53
Window Nozzle 50mm	110048750	53
Window Nozzle 75mm	110048749	53
Lap Welding Slit Nozzle 20mm.....	110048649	53
Reduction Nozzle 20mm	110048751	53
Reflector Nozzle 75mm	110048650	53
Reflector Nozzle 39mm	110048645	53

Accessories for HG 2220 E, HG 2320 E/ESD, HL 2020 E, HL 1920 E

Reduction Nozzle 6mm	110037033.....	54
Set Reduction + Reflector Nozzle 9mm	110048646	54
Reduction Nozzle 14mm	110048647	54
Pinpoint Reducer	110049668	54
Reflector Nozzle 14mm	110048752	54
Sieve Reflector Nozzle 50x35mm.....	110038724	54
Welding Nozzle	110048648	54
Welding Nozzle	110048747	54
Angle Slit Nozzle 40 mm	110048748	54
Wide-Slit Nozzle.....	102270901	54
Pressure Roller Ø 45 mm	110049584	54
Pressure Roller Ø 35 mm	110031646	54
Pressure Roller Ø 50 mm	110038455	54
Pressure Roller Ø 33 mm	110048203.....	54

1 mm Nozzle	110019581	77
12 mm Spreader Nozzle	110049580	77

Quality and service.

STEINEL Brand

- STEINEL has been brand leader in hot air tools for over 30 years
- German engineering
- Produced in Europe

STEINEL Customer Service

- Phone: (952) 888-5950
(800) 852-4343
- Fax: (952) 888-5132
- Monday – Friday 7 a.m. – 5 p.m.

Certified Quality

All products from STEINEL comply with European safety standards. Despite involving a huge effort and not always easy from a technical point of view, we're never deterred. Because it's all worth it. So you get certified quality – every step of the way.
