AdaBox006 – CircuitPython

PRODUCT ID: 3697

AdaBox006 – CircuitPython is the perfect gift for folks who are just getting started in the world of DIY electronics. It's an excellent addition to our family of DIY projects, *plus* it's a solderless pack. This is also a great way to test the waters of AdaBox before committing to a subscription.

Please note! This is NOT the subscription version of AdaBox! This is *ONLY* **AdaBox006 that shipped out to AdaBox subscribers in Dec 2017. This version** *does not* **include free shipping.** If you'd like to subscribe to AdaBox, please visit the **AdaBox page!**

Feeling the bite of the cold and wind outside? Why not slither indoors and snuggle up with your very own cuddly Python? What? A snake?!

Yesssssssssss, this AdaBox is Python powered!

You'll soon find yourself charmed by the power and flexibility of CircuitPython, not to mention its ease of use. And the Python strikes fast -- with no need for a compiler or IDE, you'll get your code up and running on the board quicker than ever. We think once you try it you'll be hooked by how easy it is.

If you're an international customer (outside of the UK, France, and Germany), this is currently the only way to get an AdaBox (for now - we're working on it!) and if you're a subscriber who missed out on boxes one and two, a great way to spend your time as you anxiously await AdaBox007.
